The Vehicle Tracker from KSI will tell you Where a Vehicle Went, Driving Time, Date/ Location/Time Arrived (Distance/Miles) and how long it was parked. It will also tell you how fast the vehicle was traveling at any given time.

The Vehicle Tracker will hold up to 300 hours of driving time. The recorded data is downloaded to your computer and will provide a digital street map displaying the traveled routes and report similar to the above sample.

The Vehicle Tracker can be setup in a matter of minutes. Many of our customer have put them in the glove compartment. No electrical cables to run, etc.

Cables for downloading included with Mapping and Reporting software.
